0 of 0 review helpful Excellent By Ed Arlington I looked into tons of bird books and this one is one of the best It gives a general overview of the different birds that inhabit the Boston area during the seasons The illustrations are nice and it has a calendar of when to expect their presence This book combined with Sibley's guide is perfect for birding the Boston area This attractive guide identifies the birds most likely to be seen in your city's backyards streets and parks The books introduce the fascinating and popular pastime of birdwatching and include advice on building feeders and birdhouses Color illustrations help you identify birds quickly while the text provides interesting information about each bird These books are easy to use references for the urban birdwatcher The text is simple succinct and stunning each page is a small work of art About the Author CHRIS FISHER is a university educated naturalist with a background in research in endangered species management and wildlife
